Mistakes to avoid when taking photos with the CarCutter App
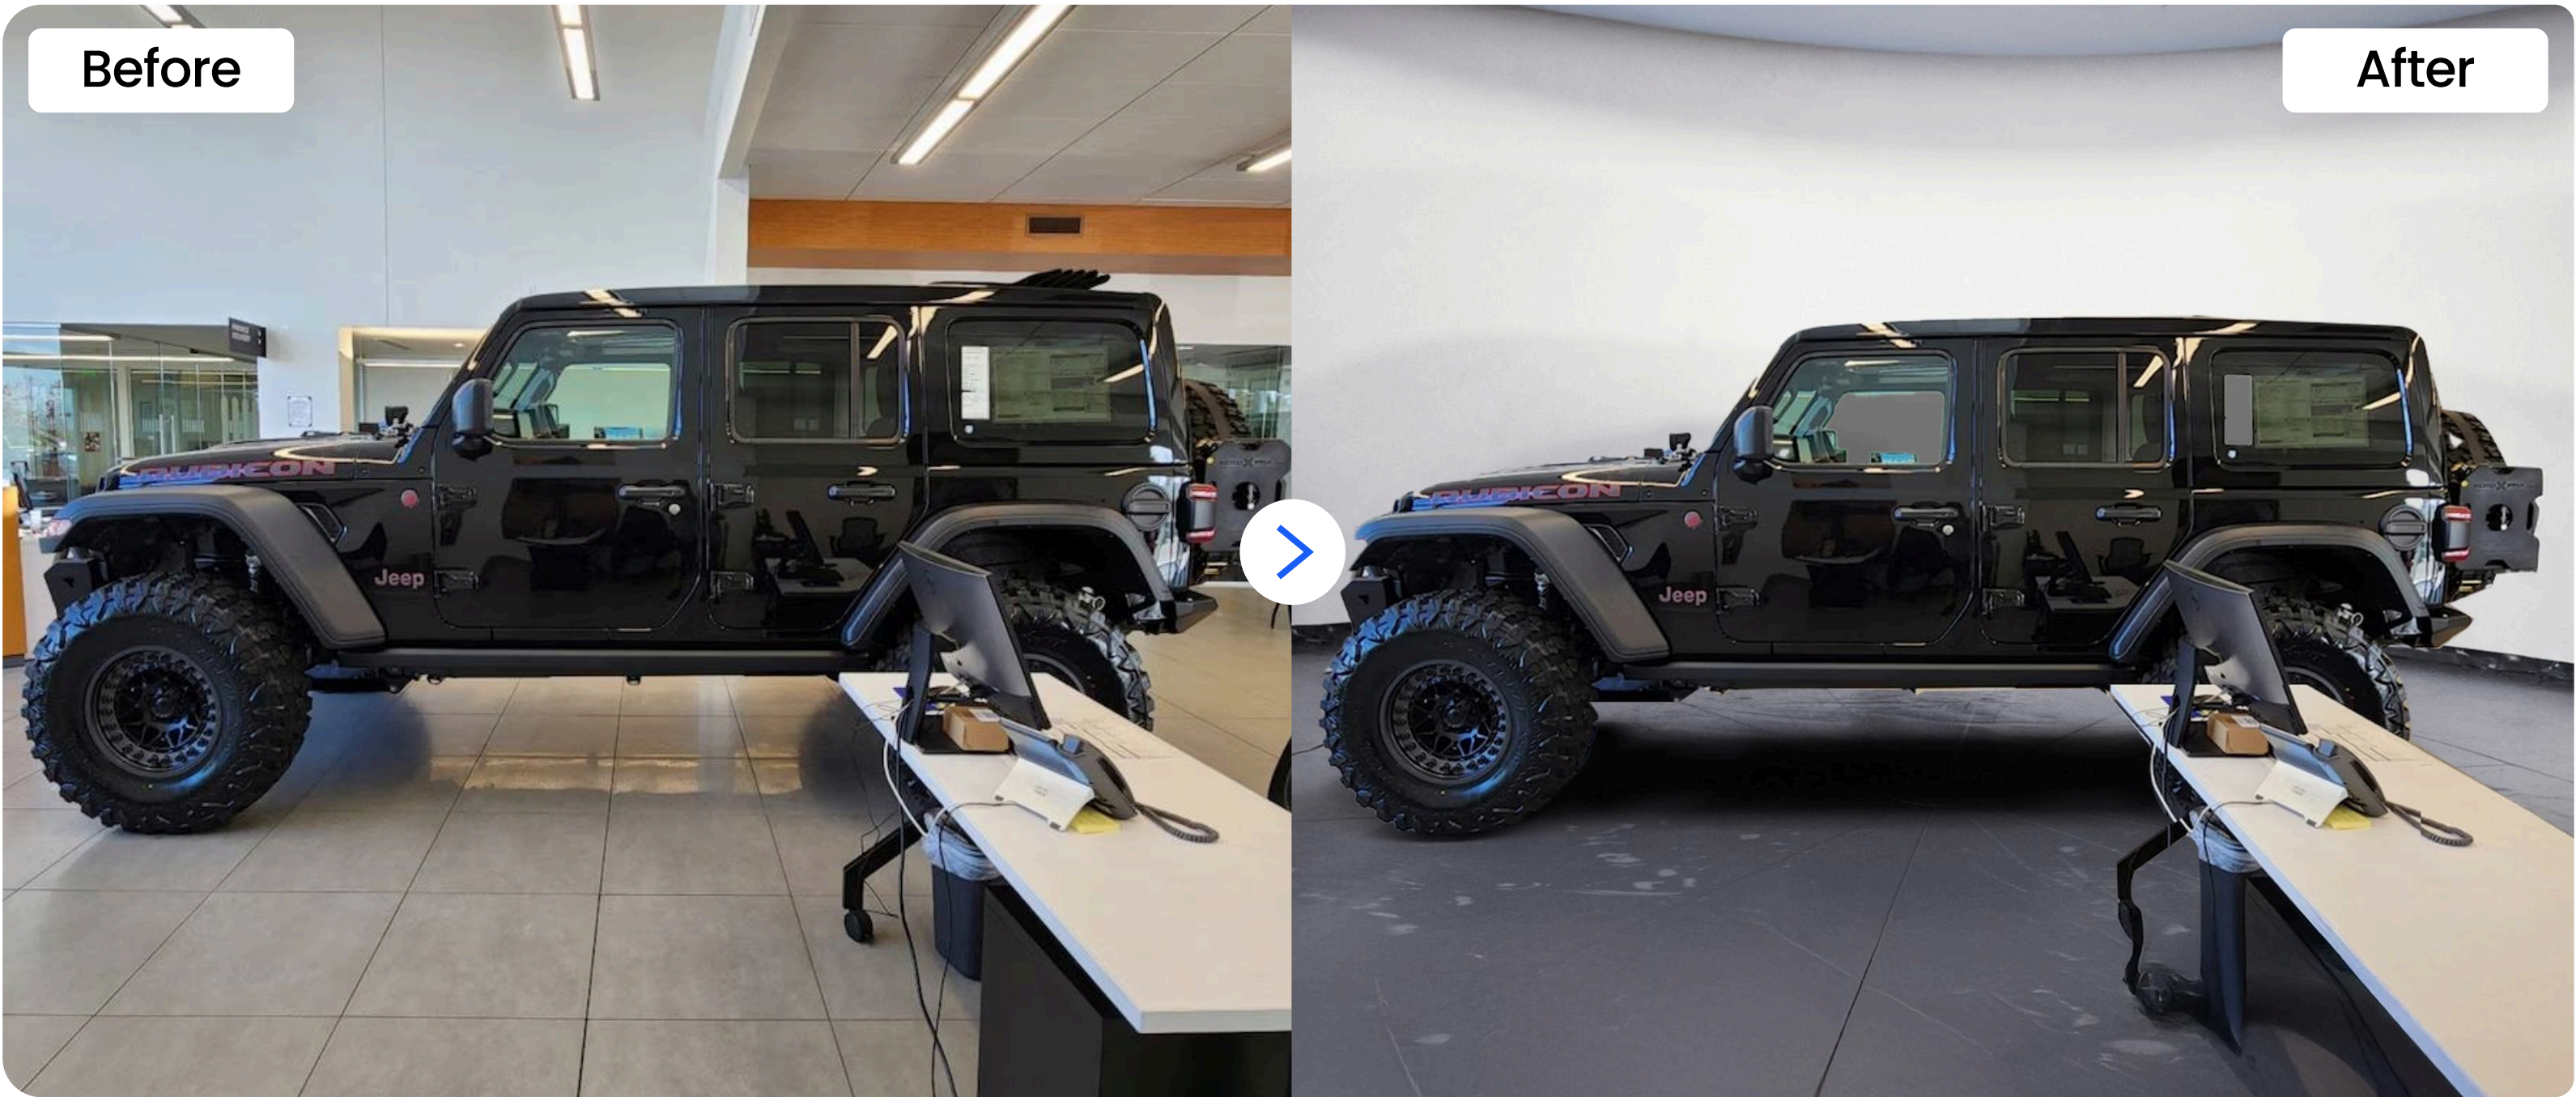

⊗ MISTAKE 01

Obstructed Vehicles

Avoid shooting vehicles with objects in the way

Before | **After**

Vehicles photographed with objects in the foreground will be visible in the final image

⊗ MISTAKE 02

Sun Glare

Avoid shooting directly into the sun when capturing a vehicle

Before | **After**

Shooting into the sun creates reflections on the vehicle and reduces image quality

⊗ MISTAKE 03
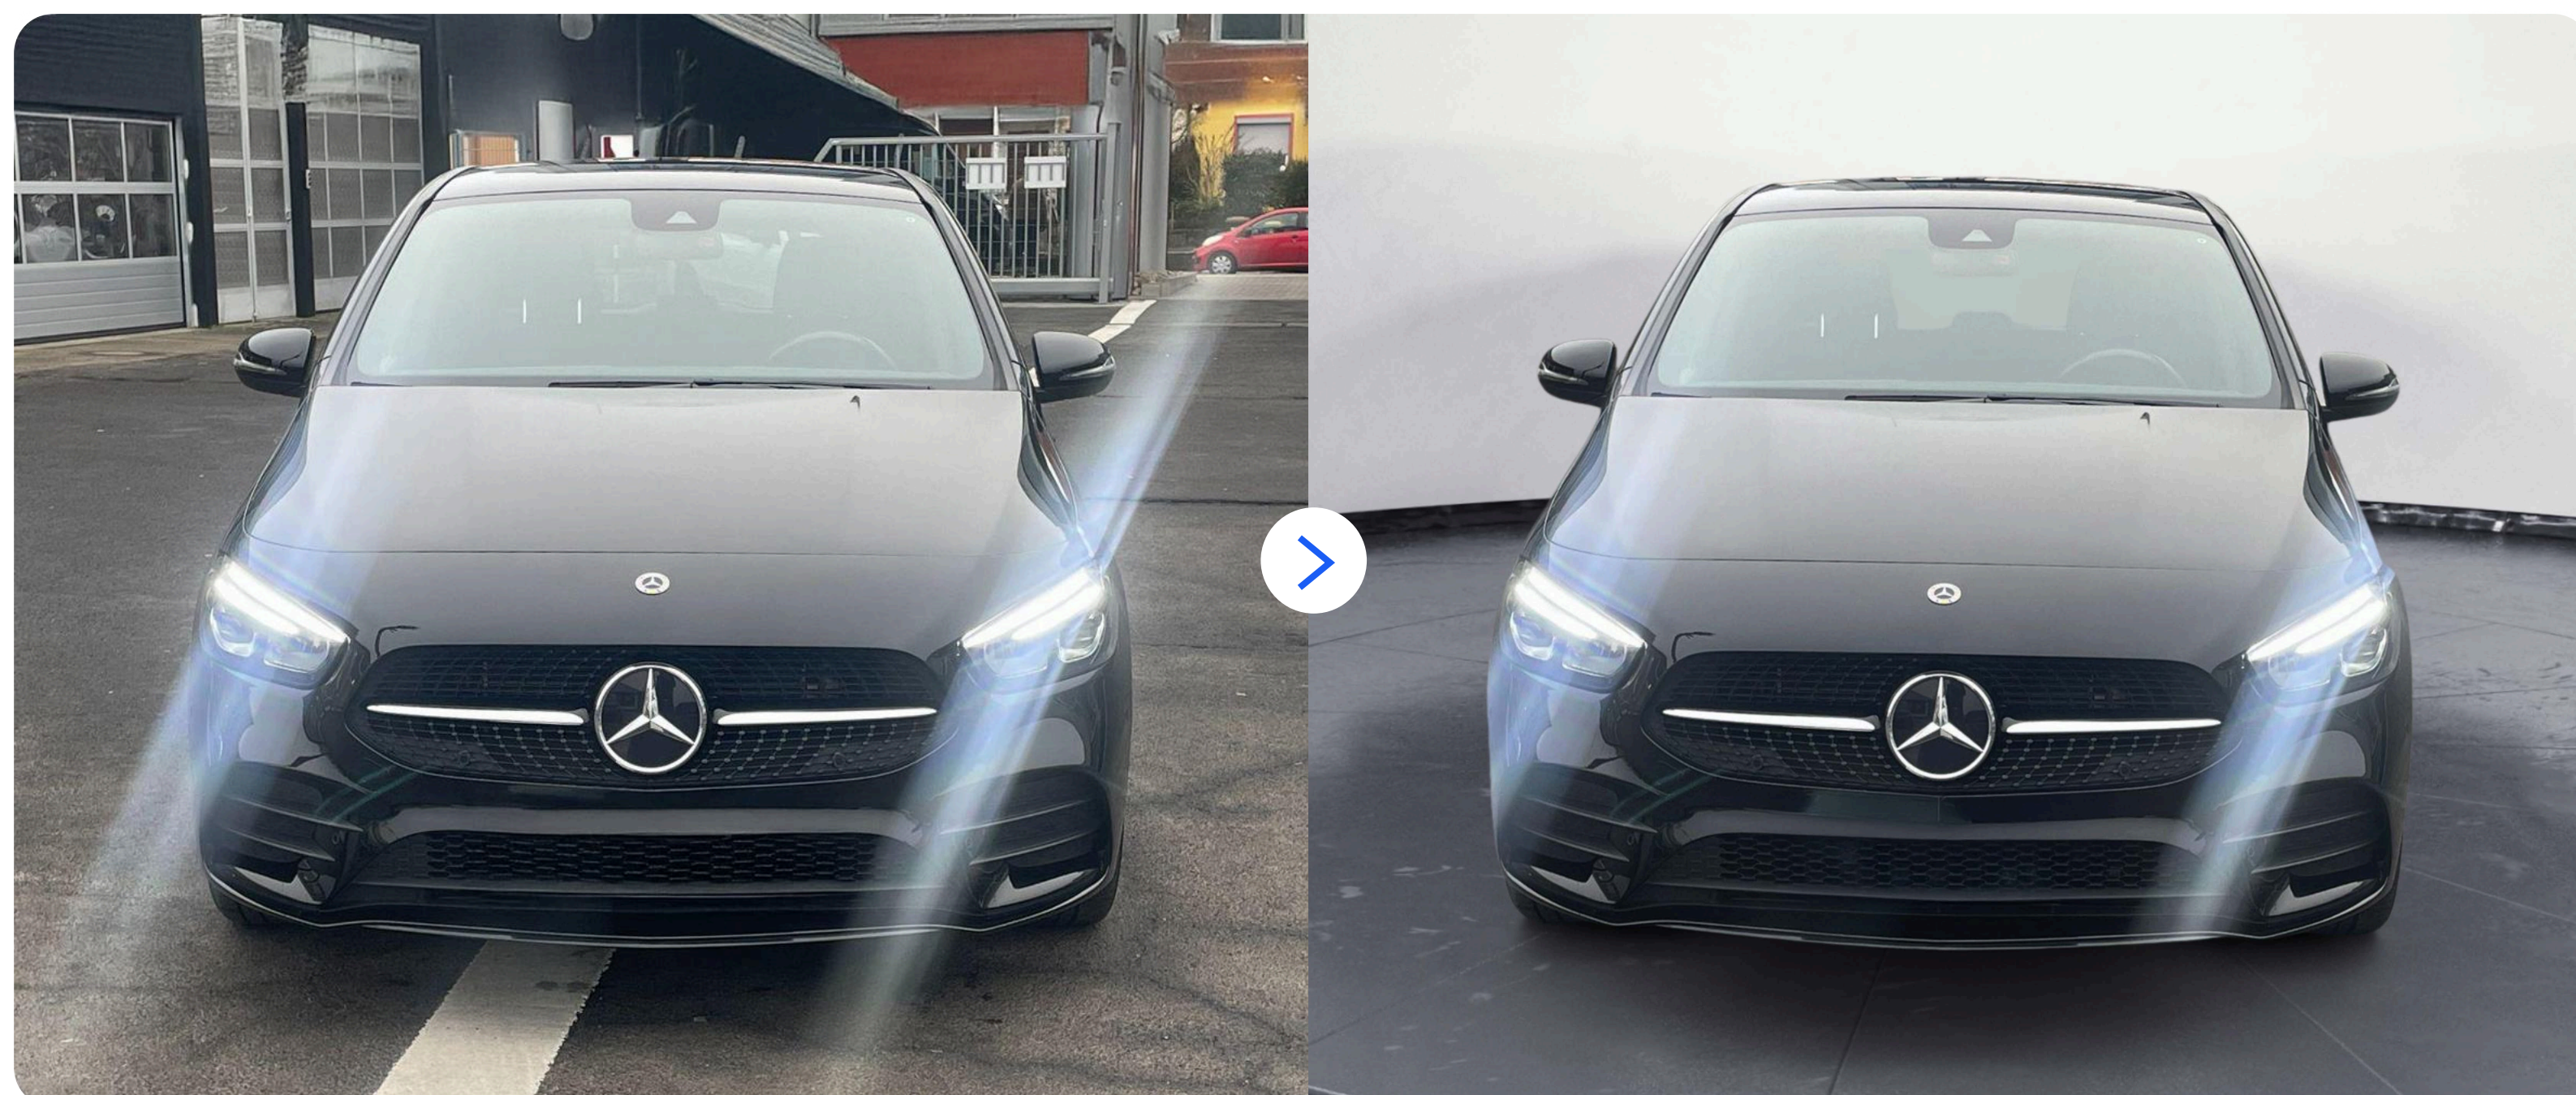

Shadows

Avoid casting your own shadow onto the car

Before | **After**

Shadows captured during shooting mode will be visible in the final image

Mistakes to avoid when taking photos with the CarCutter App

MISTAKE 04

Headlights Left On

Ensure headlights are turned off

Headlights create reflections on the vehicle which will show up in the final image

MISTAKE 05

Running Left Engine

Ensure the motor is turned off

Before

After

Running motors create exhaust fumes which can lead to low quality results or cut errors

MISTAKE 06

Shooting Vehicles In Bad Weather Conditions

Avoid shooting vehicles when it is raining.

Ensure that the vehicle is dry.

Before

After

Water droplets create an unrealistic final image and make it hard to see the finer details of a vehicle
